OVERHEAD CRANE & HOIST SAFETY

Kentucky League of Cities Insurance Services (KLCIS) Members Get REDUCED Pricing on Inspections and Maintenance of Cranes and Hoists

Hoists and cranes provide crucial means for moving large, heavy materials. However, there are several risks involved when these devices aren't properly maintained and inspected. Hoists, cranes and other lifting devices that aren't covered under a routine inspection and maintenance program can lead to loss of property and, more importantly, severe injury or death to workers in proximity to them.

Did you know that OSHA and ANSI require a periodic and thorough "hands-on" inspection of cranes and hoists? This inspection must be performed on a monthly to annual interval that is based on operating environment, use and condition of the particular equipment. The periodic inspection must be documented showing the items that were inspected as well as their condition.

OSHA and ANSI also require that a maintenance program based on the manufacturer's recommendations be implemented and followed.

KLCIS Loss Control Specialists can provide an overview of what is needed at your next safety committee meeting.

We are also proud to announce that CRANE 1 Services out of Louisville, Ky., has agreed to offer all KLCIS customers a reduced rate on inspections and maintenance of your cranes and hoists. The following rates apply to KLCIS customers:

Standard Rate

- Labor Rate: \$72.00 per hour per man
- Mileage: .45 cents per mile
- Overnight Stay: If required, \$120 per night

KLCIS Rate

- Labor Rate: \$60.00 per hour per man
- Mileage: .35 cents per mile
- Overnight Stay: If required, \$100 per night

In addition, KLCIS will allow you to turn in the cost of the crane inspections and maintenance on future KLCIS safety grant applications.

**Please contact CRANE 1 Services at 502-493-2901 for an appointment.
